

Dashrath Bhil

Backend Developer

dashrathbhil.in@gmail.com | +91 9638028505 | Ahmedabad, Gujarat | [Portfolio](#) | [Linkedin](#) | [GitHub](#)

SUMMARY

Backend Developer experienced in building scalable multi-tenant systems, REST APIs, and backend workflows for CRM and financial platforms. Skilled in translating business requirements into secure, production-ready backend solutions.

SKILLS

Node.js, Express.js, REST APIs, PostgreSQL, MySQL, MongoDB, Sequelize ORM, Redis, BullMQ, Multi-Tenant Systems, RBAC, Query Optimization, AWS S3, Zoho Sign API, OAuth Token Management

WORK EXPERIENCE

Backend Developer, Azentra Technologies July 2025 – Present

- Architected scalable multi-tenant backend systems and secure REST APIs for CRM and financial platforms with RBAC authentication and optimized relational database workflows.
- Designed quote engine workflows, financial process automation, and third-party integrations for scalable production backend systems.

Software Developer Intern, FramboxxIT Pvt Ltd July 2024 – June 2025

- Built full-stack web applications and REST APIs using the MERN stack while contributing to backend workflows and responsive frontend integration.

PROJECTS

AMSL Broker Portal, Tech: Node.js, Express.js, PostgreSQL, Redis, BullMQ, AWS S3, Zoho Sign API

- Sole backend developer responsible for building a configurable multi-tenant broker platform with 250+ APIs, RBAC authentication, supplier management, customer lifecycle operations, commission structures, and hierarchical agency/sub-user systems.
- Researched and implemented complex UK utility domain workflows, including regional postcode mapping, supplier price structures, and utility-based quotation logic to power intelligent broker and customer operations.
- Engineered a high-performance quote engine optimizing large-scale supplier pricing matrix processing, dynamic utility matching, and real-time quotation workflows for scalable backend operations.
- Integrated contract generation, payment scheduling, ticketing systems, and Zoho Sign workflows for scalable operational management.
- Implemented Aircall telephony integration using frontend SDKs, backend APIs, and webhook workflows for call activity tracking and operational customer communication management.

AUC - Multi-Tenant Debt Recovery CRM

- Developed a multi-tenant debt recovery CRM with RBAC-based admin, agent, client and customer workflows for large-scale field recovery operations.
- Implemented automated region-based customer assignment logic, CSV customer import pipelines, commission structures, and debt recovery lifecycle management.
- Engineered real-time operational systems including live site-visit notifications, customer reassignment handling, and agent activity tracking for debt recovery operations.

TRK Finance - Finance Management System

- Financial CRM platform for managing customer onboarding, loan processing, document verification, EMI scheduling, investor fund distribution, and repayment tracking workflows.
- Streamlined backend APIs, financial workflows, database operations, and automated email scheduling systems for scalable loan management processes.

Accounting Software

- Financial accounting platform for managing invoices, bills, payments, credit notes, inventory, suppliers, customers, and double-entry bookkeeping workflows.
- Enhanced journal entry processing, payment allocation workflows, transactional database operations, and PDF/S3-based financial document management systems.

EDUCATION

J.J.C. Education Commerce College, Junagadh,

2021 – 2024

Bachelor of Commerce

- Academic First Rank Award recipient
